

PREMIER SALE

CASTLE DOUGLAS

SALERS CATTLE SOCIETY OF THE UK

**32nd ANNUAL SALE OF
PEDIGREE & COMMERCIAL SALERS**

Kindly sponsored by the

**Farmers
Guardian**

FRIDAY 3rd NOVEMBER 2023

11.30am – SHOW, 15.00pm – AGM, 19.00pm – DINNER

JUDGE: Mr Peter Donger, Seawell Salers

SATURDAY 4th NOVEMBER 2023

held under NBA rules

8.00am – COMMERCIAL JUDGING, 10.00am – BULL PARADE, 11.00am – SALE

245 x Commercial Breeding Females

19 x Production Females

4 x Pedigree Haltered Females

26 x Pedigree Bulls

CATALOGUE

Sale Order & Arrangements

KINDLY SPONSORED BY THE
FARMERS GUARDIAN

32nd ANNUAL COLLECTIVE SALE OF 294 SALERS CATTLE

(held under the auspices of the Salers Cattle Society of the United Kingdom)

IN SALE ORDER

245 x Commercial Breeding Females

Comprising:

55 x In-Calf Heifers

190 x Bulling Heifers & Heifer Stirks

Followed by:

19 x Production Pedigree Females

4 x Pedigree Haltered Females

26 x Pedigree Bulls

SALE ARRANGEMENTS

SATURDAY 4th NOVEMBER 2023

Commercial Judging (*pens of 4 and above*) – 8.00am

Parade of Bulls –10.00am

Sale –11.00am

Purchaser's Slip

NOTICE TO PURCHASERS

All stranger's cheques must be guaranteed by Banker's Reference.

We wish purchasers to know that all Pedigree adult cattle in this catalogue, at the sale have either been D.N.A tested or are clear by parentage for a genetic condition which rarely occurs in Salers Cattle, known as BETA-MANNOSIDOSIS

Sale Rules

- All pedigree animals must be halter trained and shown.
- Any animals showing signs of bad temperament will be rejected and removed from the premises. The Society decision will be final.
- All pedigree animals must be registered with the Salers Cattle Society of the UK.
- All the above rules will be strictly enforced.
- All animals will be sold in accordance with the terms and conditions of the National Beef Association, copies of which are available from <https://www.nationalbeefassociation.com/resources/nba-terms-conditions-of-sale/>

NOTICE TO EXHIBITORS

- All bulls and females in the pedigree section (this excludes commercials and production females) must be halter trained and wear a nose leader / nose clip / nose snip when shown.
- The halter will become the property of the purchaser after the sale.
- It is the sole responsibility of the vendor to ensure that animals are haltered when they are delivered to the purchaser.
- The Auctioneers do not hold themselves responsible for any errors they may find.
- Prior to the numbering of the animals it is essential the exhibitor should ascertain that each animal is in the correct stall.
- Ear marks must be checked prior to sale.
- It is recommended that all stock men and women wear white coats.

SALERS CATTLE SOCIETY PRE-SALE INSPECTION GUIDELINES

Veterinary Inspection

1. Overshot or undershot jaws or other abnormalities.
2. Defective genital organs
3. Any other veterinary defects including warts, umbilical hernia and other hereditary conditions.

Breed Inspection

1. Faulty, illegible or incorrect ear tags.
2. Any animal exhibiting temper or unruly behaviour.
3. Any animal not exhibiting accepted breed characteristics.
4. Any animal below a reasonable standard of physical condition.
5. Any animal regarded as below the required standard due to either inferior or defective conformation. This covers every point of conformation including the ability to stand and walk properly.
6. Any animal that is not showing reasonable growth of age.
7. Any animals that is unsound, or appears ill, or under the influence of sedation

NOTICE OF GRADE REGISTER

A grade Register is in operation for grading Salers cross females up to purebred status. An 'A' after the Herd Book number and Ear number indicates that the female is 50% ($\frac{1}{2}$) Salers. Subsequently a 'B' indicates that the female is 75% ($\frac{3}{4}$) Salers. In accordance with the E.E.C regulations, the heifer calf born to a 75% ($\frac{3}{4}$) Salers dam is considered purebred Salers at 87.5% ($\frac{7}{8}$); she must also be inspected. Males achieve purebred status at the next cross 93.75% ($\frac{15}{16}$). Only 'Full Blood' bulls may be used to grade up females. 'Full Blood' indicates pure French breeding. Calves, which have purebred, as opposed to full-blood breeding in their pedigree cannot reach full-blood status, but in every other respect they are treated in exactly the same manner.

Health Status

Johne's

All cattle entered and presented at this sale must be from vendors who are: "members of the CHeCS Herd Scheme, and who comply with the current Salers Society Ruling for BVD FREE sales, and have established their Johne's herd status and are actively monitoring and culling diseased animals from the herd"

FAILURE TO COMPLY WILL RESULT IN ANIMALS BEING REJECTED FROM THE SALE.

BVD

All cattle entered for the sale MUST be from a BVD CHeCS accredited herd or have been individually tested BVD Antigen negative. All such animals MUST be fully BVD vaccinated at least two weeks prior to the sale. Females that are sold in-calf or running with the bull must be from a BVD accredited herd or individually tested BEFORE service, with the BVD status of the bull being determined BEFORE he serves any females that are to be sold.

- CATTLE NOT FULFILLING THIS CRITERIA WILL NOT BE ELIGIBLE FOR THIS SALE.
- ALL DATES OF VACCINATIONS MUST BE GIVEN DIRECTLY TO THE MART OFFICE ON ARRIVAL AT THE MARKET.

TB

Vendors must comply with all pre and post movement testing in accordance with <https://www.gov.scot/publications/bovine-tb/pages/testing-surveillance/>

Johne's Disease Risk Levels

Level 1: There have been three clear annual herd tests. This is the lowest level of risk.

Level 2: There has been a current clear herd test, but has not yet gained level 1 status.

Level 3: At the most recent herd test there are reactors in the herd at the level of three percent or fewer.

Level 4: There has been more than three percent reactors at its most recent herd test.

Level 5: Those herds without a health plan for Johne's disease and that do not adhere to the mandatory elements of the health plan are Risk Level 5. This is the highest level of risk and additionally applies to herds that carry out no testing. Risk Level 5 herds will not be allowed to enter Salers Society Sales.

Once a herd has been accredited at Level 1, achieved two further clear tests, with more than 20 home-bred adults in the herd, the herd can opt for biennial testing providing all cull cows and animals not born in the herd are tested in the intervening year.

Selling on animals that have been purchased from another herd: When an animal is purchased from a herd with an inferior Johne's disease risk level than the herd to which it is added, the purchased animals retains the risk level of the herd of origin should it be sold on. For example it cannot be sold as risk level 1 if purchased as risk level 2, 3, 4 or 5.

Animals that are purchased from a herd with a superior risk level can be sold only at the risk level that applies to the purchasers herd at the time of the subsequent sale.

For example, an animal purchased as risk level 1 into a risk level 4 herd can only be sold at the risk level that applies to the level 4 receiving herd at the time of subsequent sale.

QR Codes

In this catalogue we have printed QR code for each animal, this will take you to the web page which will give you full information on pedigree, bar charts and photographs if available.

Step 1

Download and install a QR code app on your smartphone if you don't yet have one. Open your App Store, Market, Marketplace or App World application (for the iPhone, Android, Windows Mobile and BlackBerry platforms, respectively).

Step 2

Search for "QR code reader," and then download and install a free app. The app should be named something to the effect of "QR Code Scanner" or "QR Scanner." There are paid versions of these kinds of apps, but the free ones work just as well.

Step 3

Open the QR barcode app on your smartphone and choose "scan from camera" or "scan QR code" from the main menu. A new window should open with a square in the middle of it.

Step 4

Center the QR code in the middle of the square that's currently displayed by your QR barcode app. The app should automatically take a picture of the QR code for you when it has finished scanning the code. A new pop-up menu will appear, with the QR code information on it.

Step 5

Click the link that was embedded in the QR code, this will direct you to the Society website.

UNDERSTANDING BREEDPLAN

UNDERSTANDING THE BREEDPLAN PERFORMANCE RECORDING INFORMATION IN THIS CATALOGUE

Only Salers GROUP BREEDPLAN EBVs with Accuracy (Acc) can be validly compared between herds.

ESTIMATED BREEDING VALUES (EBVs)

The EBV is the best estimate of an animal's genetic merit for that trait.

ACCURACY

An accuracy value is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives. Accuracy below 75% should be considered low.

CALVING EASE

Calving Ease EBVs are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

DIR: Direct calving ease indicates how this animal influences the birth of its progeny.

DTRS: Daughter's calving ease indicates how well the animal produces daughters that have easier calving.

BIRTH AND FERTILITY

GL: Gestation Length EBV (days) is based on AI records. Lower (negative) GL EBVs indicate shorter gestation lengths which generally relate to easier calving and increased growth after birth.

BWT: Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

SS: Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. There is also a small negative correlation with age of puberty in female progeny.

GROWTH

MILK: 200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-day weight of their calves.

200: 200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400: 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600: 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

MWT: Mature Cow Weight EBV (kg) is an estimate of the genetic difference in cow weight at 5 years of age. Smaller, or more moderate EBVs are generally more favourable.

CARCASE

CWT: Carcase Weight EBV (kg) estimates the genetic difference in carcase weight at a standard age of 650 days.

EMA: Eye Muscle Area EBV (cm²) estimates genetic differences in eye muscle area of a 300kg dressed carcase. More positive EBVs indicate better muscling on animals.

UNDERSTANDING BREEDPLAN

FAT: Rib Fat EBV (mm) estimates the genetic differences in fat depth at the rib in a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

RBV%: Retail Beef Yield Percent EBV (%) represents total (boned out) meat yield as a percentage of a 300kg dressed carcass. A more positive EBV indicates higher percentage yield for the 300kg carcass size.

IMF%: Intra-muscular Fat Percent EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13th rib site in a 300kg carcass. Depending on market targets, larger more positive values are generally more favourable.

The Salers Cattle Society GROUP BREEDPLAN Estimated Breeding Values contained in this Sale Catalogue were compiled by the Agricultural Business Research Institute (ABRI) from data supplied by the breeders. Neither the Salers Cattle Society nor the ABRI oversee or audit the collection of this data.

ALL PROCEEDS WILL GO TO UKRAINIAN CHARITIES. Ukraine is an outstanding Officer daughter who was been shown as a heifer with great success this year winning many prizes including, Overall Junior Champion and Reserve Female Champion at both the Royal Highland and the Great Yorkshire Shows. With outstanding figures for growth and strong figures for milk and coming from a female line producing a string of great show animals Ukraine has fantastic potential for the future.

RUBY ANNIVERSARY 2025

In 2025 the Society will celebrate 40 years since the Society was formed. To mark this very special occasion Council would like to arrange a series of celebrations across the Country. One idea put forward to Council was to hold a National Show in the Great Yorkshire 2025 followed by some sort of social evening including food and refreshments.

Please email secretary@salers.uk to let the Council know whether you support this idea and if you anticipate supporting the event with cattle, how many cattle you would hope to bring? To identify the emails please use the title 'RUBY ANNIVERSARY 2025'.

APPOINTMENT OF BREED SECRETARY

Dear Members,

Following our recent recruitment campaign, I am delighted to announce that Emily Simpson has been appointed Breed Secretary of the Salers Cattle Society of the UK with effect from Monday 13th November 2023.

Emily graduated from the Royal Agricultural University, Cirencester with a BSc in Agriculture Management and has previously worked for the Aberdeen Angus Cattle Society. She brings with her experience of working in the marketing and promotion field as well as a sound knowledge of the pedigree livestock industry. Emily said, "I am delighted to be joining The Salers Cattle Society of the UK and working with the council to further the aims of the Society. I'm very much looking forward to meeting and working with the members both pedigree and commercial."

Please join me in welcoming Emily and wishing her every success in her new role.

Andrew Sleigh
Chair

SALE ENTRIES

We now have a new way for members to enter animals in the Society sales held at Welshpool and Castle Douglas. The form is online via the Salers website www.salers.uk and you can also submit your herd health declaration in the same way. Stirling entries will continue to be done directly with united auctions although you can send your herd health declaration for Stirling via our website.

The form(s) is automatically emailed to the Society office, a confirmation email will be sent to the breeder and copied straight to the market.

The pedigree form allows 5 entries per form. If you have more than 5 entries, please submit 2 or 3 forms. The process is so easy it will save you time and money.

The benefits of this new system are:

- Forms can't get lost in the post
- The Society and the market are aware of entries at the same time
- Members receive confirmation that their entry has been received
- Its saves money on postage

What do the myostatin definitions mean?

- MU – Myostatin status unknown
- M0 – Tested free from myostatin
- M0P – Myostatin free by parentage
- M1 – Carrier animal, one copy of the mutated myostatin gene, one normal myostatin gene
- M2 – Carrier animal, has two copies of the mutated myostatin gene

JUNIOR BULLS – CLASS 5 (BORN 01/04 – 12/04 2022)

42 Livesey Farming
Cleuchhead Sheerkhan
 Horned Red Born UK560806601750
 Myostatin: MOP 08/04/2022
 gs. Beguin(SIM200702)
 Sire - Noble (Nobel)(IMP2016026)
 gd. Ethiopie(1932892574)

gs. Cleuchhead
 Killycrankie(UK562060701123)

Dam - Cleuchhead HOPE
 1356(UK562060201356)
 gd. Cleuchhead Hope
 10th(RAB2009010)

A dark bull with plenty growth and scale, from a line who has stamped a depth of femininity in the herd, a real cow maker.

WALLETS MARTS CASTLE DOUGLAS LIMITED

‘The Premier Marketing Centre for South West Scotland’

Castle Douglas market has long been established as the premier auction centre for South West Scotland. Our weekly prime sheep sale is the largest in the region and prices have consistently been ahead of many rivals. Our fortnightly store cattle and OTM sales attract regular buyers from throughout the country resulting in a very competitive ringside of bidders. Annual breeding sales of sheep and pedigree cattle also attract great interest. All in all our services and facilities are unrivalled making Wallets the ultimate marketing choice.

Please feel free to contact us directly at any time to discuss your marketing requirements.
